Furnace Comets Most Willie Kamm Sign Up Beautiful Ever Seen

PITTSBURG, Feb. 28.—Intense blast furnace activity, combined with low temperatures, has in recent weeks given to the Pittsburg district some of the most beautiful "furnace comets" it has San Francisco club of the Pacific even seen. But they are gradually los- Coast baseball league, signed a coning their brilliancy and with the ap- tract for the 1920 season, it was an proach of spring, scientists say, they will vanish until favorable conditions

reappear next winter.

"Furnace comets" are great proad shafts of yellow light which pierce the black background of a murky sky in black background bac most spectacular manner. They flash almost without a moment's notice, and fade almost as quickly, only to reappear as bright, if not brighter than be fore. Usually there are two of them. at times rising perpendicular, but oftener cutting the sky like the beam from a searchlight.

Scientists of the Allegheny observa tory explained the lights by saying that the light from blast furnaces penetrate the atmosphere above the cit, to a great height, and there being caught by frost crystals send back the reflection in the form of broad bands. For years they have passed almost unnoriced until this year, when, because of the continued operation of large numbers of furnaces, they became
